

**Amendments to the Specification:**

Please replace the paragraph on page 5 with the following amended paragraph:

**Description of the Preferred Embodiments**

Figure 1 shows a schematic high-level view of a computer system ~~401~~ 100 with an attached device 102. The device 102 is connected to the computer system ~~401~~ 100 via an interface 101. For example, the device 102 can be a graphics adapter or a disk drive and the interface can be a PCI bus or an IDE connection. Essentially, device 102 could be any component originally separate from computer system 100 that is to be subsequently integrated with the computer system 100 and for which, conventionally, a rather involved installation procedure may be required. Thus, for instance, device 102 could also be a modem, a printer, a sound card, a video card, a graphics card, a IDE or SCSI adapter, a network interface card, a network controller, a CD ROM drive, or a tape drive.
